

# DCS ReamerSticks and SuperSticks

*Solid Sticks for Quick Cleaning and Lubricating in Clay Applications*

## Description

DCS SuperSticks quickly clean the bit and Bha with a combination of surfactants and dispersants. ReamerSticks are solid soap sticks that sweep the bottom hole and clean off clay and lubricate the bit and drill pipe. Both are packed in cardboard tubes

## Characteristics

- When added directly down the drill pipe to clear bit balling, DCS SuperSticks and ReamerSticks will breakdown the clay and sweep it from the bit and drill pipe
- SuperSticks will also treat the clay downhole by weakening the reactivity that causes it to stick and swell
- ReamerSticks reduce torque by clearing the clay from the BHA and lubricating the drill pipe

- The wrapping will self-dissolve when exposed to water and pumped downhole
- Dimensions: 1 1/4" X 15"

### **Mixing Dosage Rates**

- To clean clay off the BHA and pipe: remove from the cardboard tube and add 1-2 QuickSticks down the drill pipe on connection. Pump as normal while drilling ahead.

### **Packaging**

DCS ReamerSticks and SuperSticks are available in re-usable ice chest packed with 36 each (72 sticks total)
