

DCS SwellSticks

Lost Circulation Material

Description

SwellSticks are a convenient method for applying LCM directly down the drill pipe. SwellSticks are quick-dissolving tubes filled with DCS SuperSwell and can be pumped down the pipe on connections to slow or stop lost circulation and solve IR issues.

Characteristics

- SwellSticks can be used with any type of drilling fluid and any fluid additive
- SuperSwell filler will become a soft pliable material and will swell to 500 times its original volume over time
- Easily applied and easy to pump into place
- The wrapping will self-dissolve when exposed to water and pumped downhole
- Dimensions: 1 5/8" X 12"

Mixing Dosage Rates

- Used as a lost circulation material: add 1 SwellStick down the drill pipe on connection. Pump as normal while drilling ahead or while placing the SuperSwell in place.

Packaging

DCS QuickSticks are available in 5-gallon pails with 22 wrapped sticks per pail
